**We Believe Success begins
with Great Product**

A Techno-Talent Nexus for Perfection

At Pal Radiators, we believe that "Technology cannot try harder, whereas People can." It is this belief that has helped us succeed in building a human machine nexus devoted to excellence and in delivering higher value consistently.

Punctuality and flexibility is the key word at Pal Radiators. The production engineers actively support the staff in our modern factory. State of the art machines assist us in the manufacturing process. Constant research and development initiatives contribute largely in satisfying various customer needs.

PAL RADIATORS

India's One Of The Leading Copper Brass / Aluminium Radiator Manufacturers & Exporters

PAL

OUR PHILOSOPHY DICTATES -
CUSTOMER IS FOREVER.

"HEAT CONTROL AT ITS BEST"

Introduction

Established in 1988, We - PAL Radiators are dedicated to lead in the design, manufactures and export of innovative thermal transfer products. Our range of products includes Radiators for Copper Brass and Aluminium Brazed Type. Leveraging on our invaluable experience gained over long industry standing.

We design and manufacture radiators to 9001: 2008 systems that comply to standard . We cater to thermal management requirements of Global Automotive, Construction, Rail Industries. Defense, Tractor & Harvestors and OEMs.

We are also producing large variety of Radiators, charges Air coolers and condensers for passenger Vehicles, Heavy commercial Vehicles, OFF Road Highway Vehicles, Industrial, Agriculture and Stationary Engines Etc.

PAL has started its new state of art Aluminum Brazed facility for manufacturing of condensers, inter coolers (Charged Air Coolers), Oil Coolers and Combi Coolers etc.

We devote our self to expanding the international market, our products apart from being sold within the country also find a good growth in Europe, United States, South Africa, SAARC, Middle East Countries,. We are capable of high quality and reasonable price products according to the need of the customers. You will experience it while working with us.

Combination of space design of the FIN and tube of Radiators we provides a High Heat dissipation to meet fast cooling.

We proudly manufacturing 350 Plus active Radiators Model for global Market.

PAL AVENUES TO A BRIGHT FUTURE

Change is the only constant in life. It's the believe that has helped foster a positive approach to the challenge of change at PAL Radiators. To mangle change is to innovate without stopping. For, if you don't innovate, your viability and goodwill evaporate. Therefore at PAL Radiators, the volatility of the market is a constant reminder, and an inspiration for all of us, to power our energies into breaking new grounds with our products.

COPPER BRASS RADIATORS

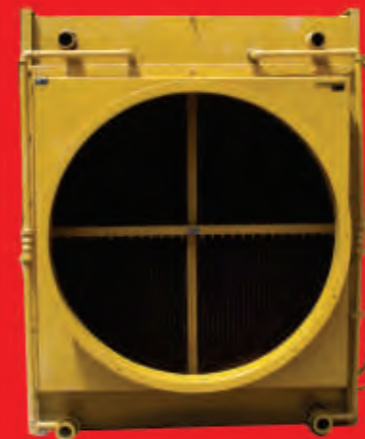

Combination of the Special Design of the Fins and Tubes of the Radiator, that provides a High Heat Dissipation output and fast Cooling.
